

COMPANY PRESENTATION

| The Keystone to gain competitive advantage

The Unique Italians
Freight Auditors

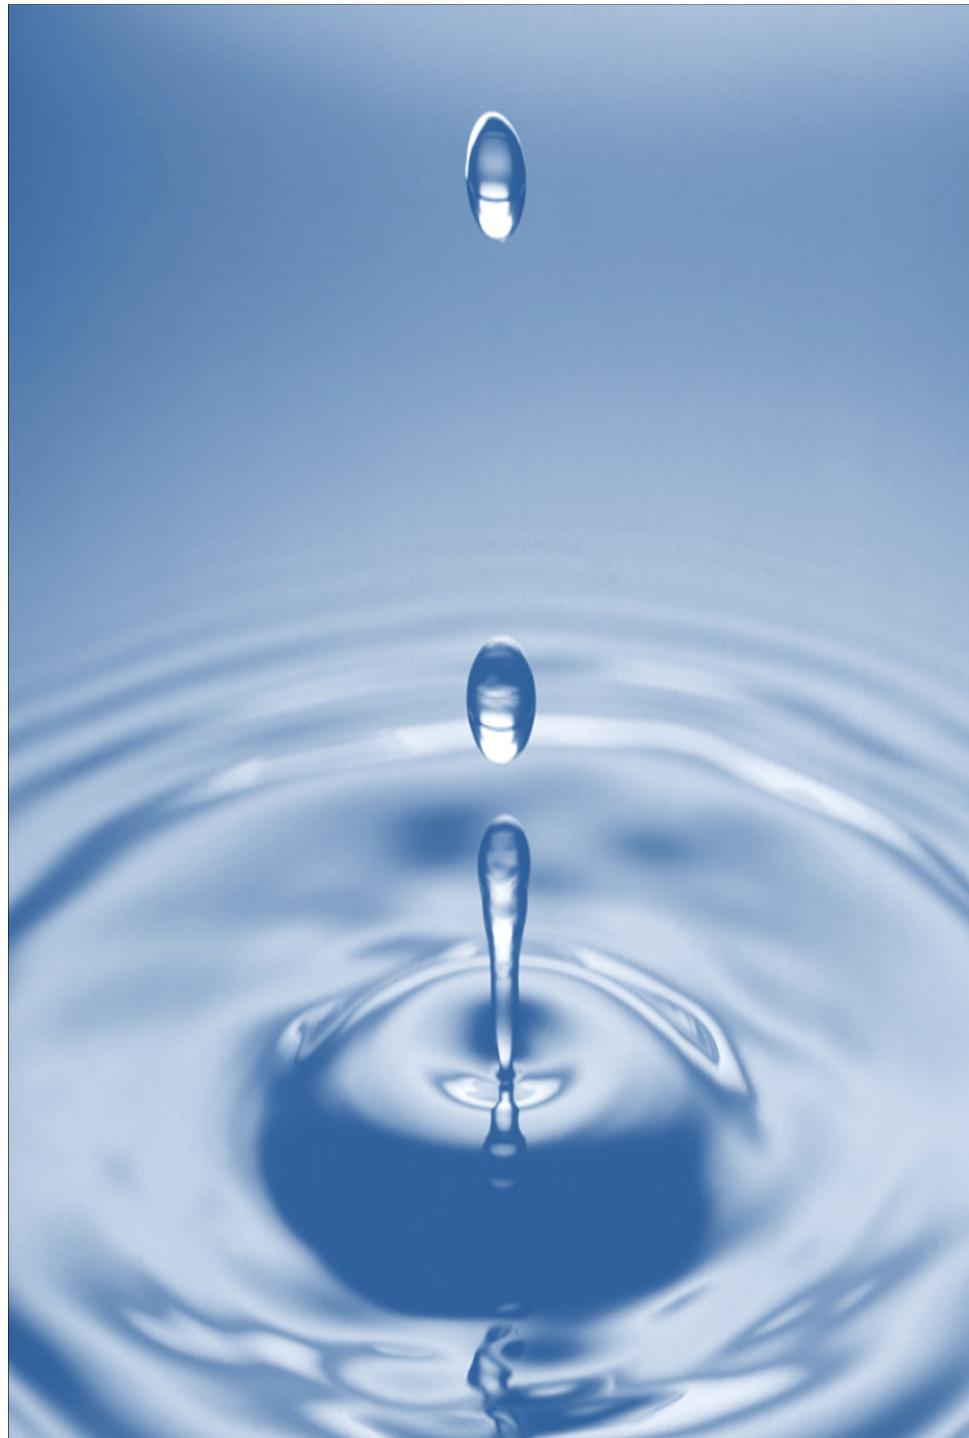

PROFILE

ЬКОНІГГ

Founded in 2002 C&F Europe is an independant freight auditing & consulting company, based in Turin (Italy) and Paris (France) which specialises in the verification and accuracy of all types of transportation and logistics costs.

Transport cost reduction and service improvement activities are our core activities and we provide a variety of assessment reviews and audit services focussed on ensuring that your company's transportation and logistics costs are as low possible, whilst still delivering the targetted service levels .

OUR ORGANISATION

The slide features a map of Europe where countries are colored in various shades of purple, blue, green, and yellow. Three callout boxes point to specific regions: one pointing to France labeled 'C&F Europe/France/ Managing Director Mr. Jacques Pons', one pointing to Italy labeled 'C&F Europe /Italy/ Managing Director Mr. Claudio Cogo', and one pointing to the bottom right corner of the map labeled 'GALAXIA'.

OUR SPECIALISTS

ОУР СПЕЦІАЛІСТИ

Our **freight audit specialists** will:

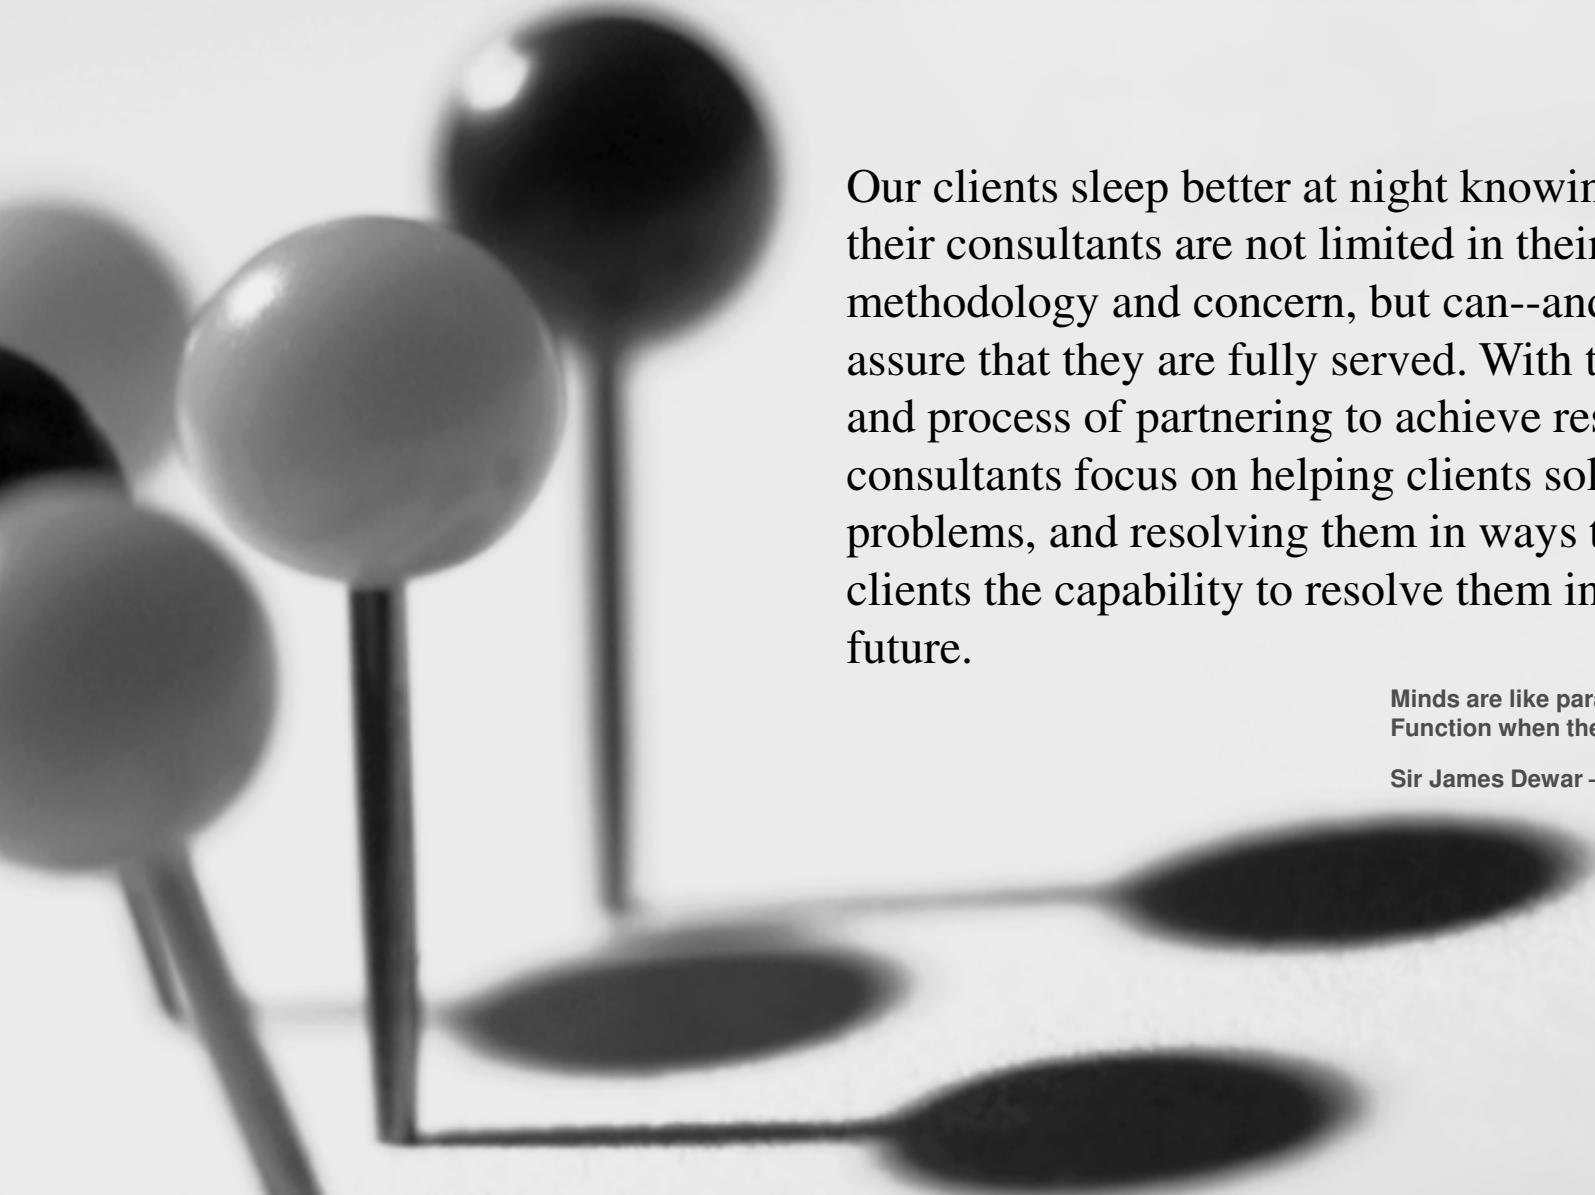

Provide a **detailed analysis** of where you are spending your money, in the area of **transportation and logistics**, where efficiencies can be made and how best to audit your own **transportation costs** with or without relevant software support.

Make recommendations on current and future levels of **transportation outsourcing**, regarding both benefits and deficiencies, to suit your business

Provide a discreet, informative and confidential investigation service into any issues or concerns you may have regarding existing freight transportation processes and transport expenditure

OUR CONSULTING PHILOSOPHY

ОУК СОНЗОГЧИҮҮ ҮНІГӨӨЗӨҮҮЛ

Our clients sleep better at night knowing that their consultants are not limited in their methodology and concern, but can--and will--assure that they are fully served. With the attitude and process of partnering to achieve results, our consultants focus on helping clients solve their problems, and resolving them in ways that give clients the capability to resolve them in the future.

Minds are like parachutes. They only
Function when they are open

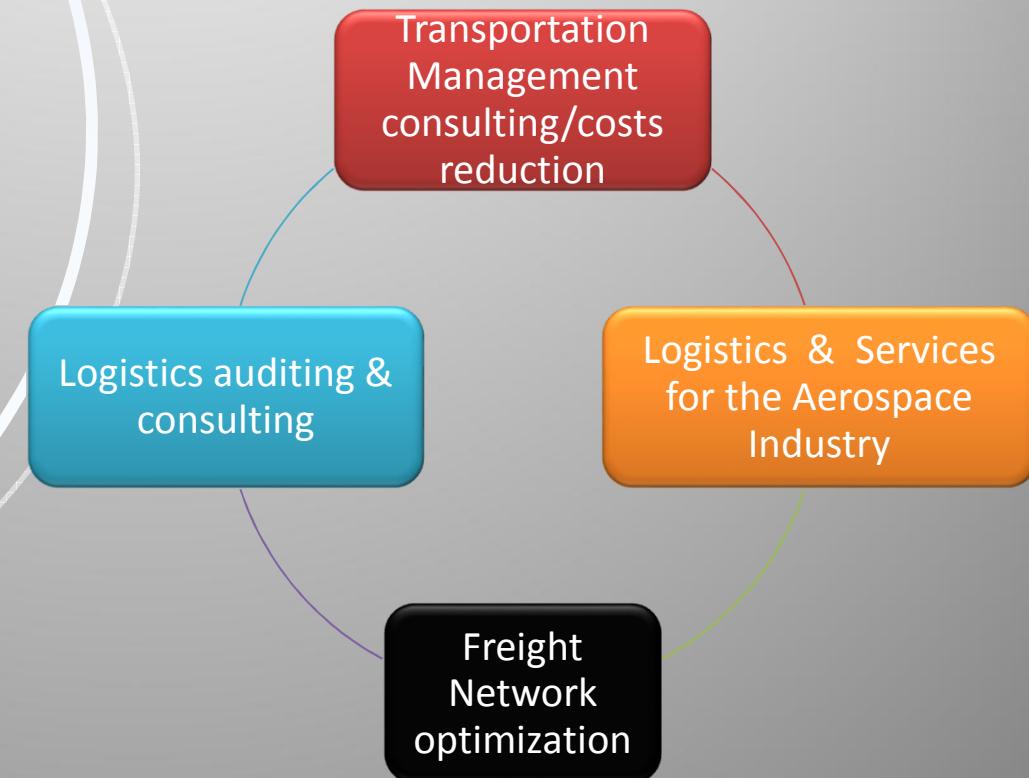

Sir James Dewar – Scientist – 1877-1925

OUR ACTIVITIES

ONAK VAKTILIE?

The activities of C&F Europe are focused on 4 different fields

TRANSPORTATION MANAGEMENT CONSULTING

You can trust the team at C&F to perform a comprehensive audit of your freight transportation program. We identify, quantify and rank a list of cost savings opportunities based on impact, time to complete, payback period and other variables. As part of the audit we will:

- Examine all transportation processes
- Assess transportation planning and order management
- Investigate loading, pallet configurations and cube utilization
- Look at technology used, data quality and KPI management
- Review current line haul and delivery processes

As a part of our transportation management consulting process, our research includes face to face interviews with your key transportation and supply chain management personnel; administration of a transportation strategy and technology questionnaire, site visits to plants and distribution centres and a careful review of your company's shipping data. We can also work closely with you to ensure an effective implementation

TRANSPORTATION COSTS REDUCTION

We operate a **very simple 4 stage process** that we hope culminates in our clients receiving real benefits to their organisations in terms of annual cost savings and improved quality of service:

- Step 1: Initial exploratory meeting with the client**
- Step 2: Analysis**
- Step 3: Sourcing of new rates / suppliers**
- Step 4: Presentation of findings**

FREIGHT NETWORK OPTIMIZATION

Reduce costs through effectively consolidating and pooling freight

Cost savings come from consolidating small orders into larger ones, creating pool or integration points to create economies of scale and using the most cost effective mix of transportation and distribution facilities.

Our understanding of the transportation market gives us valuable insight that can greatly help your organization. If you maintain purchasing and transportation as different cost centres, we evaluate opportunities to create round trips and leverage the combined volumes. In cases where freight allowances are provided to certain customers, we evaluate the trade-off between paying the freight costs versus shipping prepaid. We seek out and identify all viable opportunities to improve efficiencies.

LOGISTIC CONSULTING & AUDITING

Lack of effective logistics planning causes many organisations to incur excessive costs and suffer inefficiencies, or fail to maximise revenue potential. However, many companies lack the expertise or time to conduct an effective review of their core processing expenditure. Using our well-proven methodology C&F Europe can review your company's business processes and suggest options to eliminate waste and eradicate or revise time-wasting, or redundant processes.

LOGISTICS & SERVICES FOR THE AEROSPACE INDUSTRY

We leverage key industry contacts and our broad aerospace background to provide unique solutions for our client's challenges in the field of logistics (and not only)

Our services:

- We assist the Aerospace industry for the release of the USA Dept. of State licence.
(Import of Military materials)
- Logistic assistance on A.O. G
- Data Entry (Nato confidential docs)
- Assistance on customs procedures for aeronautical parts

WE ALSO WORKED WITH ...

Feedback of our customers is always the force that make us grow and improve
